

OPAQUE BLOCKOUT POLY BANNER “TWO” SIDE TREAT SUBSTRATE

Stable, non-shrink film.

Reduced static film properties.

Flat Poly – One of best in industry.

Dual use film (Litho & Screen applications).

Excellent curing UV inks at 48+ dyne custom & stock.

Excellent “White” opacity and “Block” (dependent on overall thickness).

Excellent ink adherence (no contaminates in film – compared to some competitors)

Better "slide" of film on vacuum table/stacked sheets compared to other two-sided banners.

Additional Crayex Benefits

Price competitive.

Consistency order to order.

Over 30 years supplying the poly banner market.

Overall quality of our product reduces customer film scrap.

Ability to produce custom sizes/gauges (minimums apply).

Cradle packaged to eliminate flat spots/indentations in rolls.

Service, as we stand behind our product and delivery promises.

Consistent and uniform treat across entire web and throughout roll.

Minimal edge waviness – flat product, allowing excellent sheet to sheet laydown.

Stock Items – All treated BOTH sides on 3” core
